### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The art rejection in section 6 of the detailed portion of the office action mailed 23 November 2010 is withdrawn in view of applicant's assertion of priority under 35 U.S.C.

119. A new ground of rejection is given below.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bontinck et al. (WO 03/022552 A1).

Bontinck teaches the formation of a coating on a paper substrate that is embossed with a relief and can be used as an embossing paper to make furniture foils, upholstery and artificial leather (page 1, lines 10-15). The coating is a urethane acrylate made from a hydroxylated acrylate (page 3, lines 1-5). There may be a two layer coating with a silicone compound as an additive in the outer layer to improve the release (page 4, lines 20-25). The instant invention claims an embossing paper for synthetic leather made of a urethane hydroxylated acrylate. It would have been within the ordinary skill of the art to have selected embossing artificial leather from the applications options

taught by the reference in order to fully practice the invention of the reference. Variation in the amount of silicone resin depending on the desired degree of release is taken as being within the ordinary skill of the art.

4. Applicant's arguments with respect to claims 1-14 and 32 have been considered but are moot in view of the new ground(s) of rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Sample can be reached on 571-272-1376. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
